

Title of the Book or Conference Name: ICTAC 2012  
Volume Editor(s): ARSHIK. ROYCHOUDHURY  
Title of the Contribution: A HIERARCHICAL MONITORING AUTOMATON CONSTRUCTION FOR LTL  
Author(s) Name(s): DEEPAK BISOUZA, RAJ MOHAN N.  
Corresponding Author's Name, Address, Affiliation and Email: DEEPAK BISOUZA  
CSA DEPT, INDIAN INSTITUTE OF SCIENCE, BANGALORE  
deepakd@csa.iisc.ernet.in  
520012

When the Author is more than one person the expression "Author" as used in this agreement will apply collectively unless otherwise indicated.

## § 1 Rights Granted

The copyright to this Contribution is transferred to Springer-Verlag GmbH Berlin Heidelberg (hereinafter called Springer-Verlag). The copyright transfer covers the sole right to store, reproduce, publish, disseminate, and sell throughout the world the said Contribution and parts thereof, as well as its translations in any foreign languages, in all forms and media of expression – such as in its electronic form (offline, online) – now known or developed in the future.

Springer will take, either in its own name or in that of Author, any necessary steps to protect these rights against infringement by third parties. It will have the copyright notice inserted into all editions of the Contribution according to the provisions of the Universal Copyright Convention (UCC) and dutifully take care of all formalities in this connection, either in its own name or in that of Author.

The parties acknowledge that there may be no basis for claim of copyright in the United States to a Contribution prepared by an officer or employee of the United States government as part of that person's official duties. If the Contribution was performed under U.S. Government contract, but Author is not a U.S. Government employee, Springer grants the U.S. Government royalty-free permission to reproduce all or part of the Contribution and to authorize others to do so for U.S. Government purposes.

## § 2 Rights Retained by Author

Author retains, in addition to uses permitted by law, the right to communicate the content of the Contribution to other scientists, to share the Contribution with them in manuscript form, to perform or present the Contribution or to use the content for non-commercial internal and educational purposes, provided that the Springer publication is mentioned as the original source of publication in any printed or electronic materials. Author retains the right to republish the Contribution in any collection consisting solely of Author's own works without charge but must ensure that the publication by Springer is properly credited and that the relevant copyright notice is repeated verbatim.

Author may self-archive an author-created version of his/her Contribution on his/her own website and/or in his/her institutional repository, as well as on a non-commercial archival repository such as ArXiv/CoRR and HAL, including his/her final version. Author may also deposit this version on his/her funder's or funder's designated repository at the funder's request or as a result of a legal obligation. Author may not use the publisher's PDF version, which is posted on [www.springerlink.com](http://www.springerlink.com), for the purpose of self-archiving or deposit. Furthermore, Author may only post his/her version provided acknowledgement is given to the original source of publication and a link is inserted to the published article on Springer's website. The link should be accompanied by the following text: "The original publication is available at [www.springerlink.com](http://www.springerlink.com)". Author retains the right to use his/her Contribution for his/her further scientific career by including the final published paper in his/her dissertation or doctoral thesis provided acknowledgement is given to the original source of publication. Author also retains the right to use, without having to pay a fee and without having to inform the publisher, parts of the Contribution (e.g. illustrations) for inclusion in future work, and to publish a substantially revised version (at least 30% new content) elsewhere, provided that the original Springer Contribution is properly cited.
